## PRESS RELEASE

### DLoG (UK) Ltd Announces a Partnership with Warehouse Management Solutions Provider Barcode-IT

Barcode-IT extends its warehouse solutions with the full range of DLoG vehicle mount computers

Barcode-IT and DLoG (UK) Ltd announce a partnership that will expand the current warehouse solutions offered by Barcode-IT, by adding the full range of DLoG vehicle mounted computers to its line up of truck terminals.

Barcode-IT is a company with a proven track record in both Automatic Identification (Auto ID) products and Software, specialising in barcode driven Warehouse Management Solutions, mobile data capture and the printing and reading of barcodes for industrial and retail applications.

Designed for use in the harshest of environments, DLoG PCs are perfect for many of the warehouse applications Barcode-IT specialise in, offering protection class IP 67 rating for dust and waterproofing on all models and full Windows XP pro, Embedded XP or CE operating systems. Cold stores and deep freeze applications are particularly well catered for as the DLoG vehicle mountable terminals are especially suited for demanding applications in extreme environments with operating temperatures from -30 to +50°C (-22 to 122°F).

DLoG places high value on its partner program, ensuring DLoG's partners and end-customers security with regard to their investment. DLoG (UK) Managing Director, John Davis says, "This partnership reflects our commitment to further expand into the UK Warehouse market and our belief in the quality of the DLoG hardware portfolio. We

believe that that Barcode-IT's warehouse solutions provide a natural complement to DLoG's wide range of mobile computers and their commitment to building professional relationships based on performance and exceptional afters sales service, will fully support the successful promotion of the DLoG brand."

*Ends*

Note to Editors:

DLoG (UK) Ltd is celebrating nearly 20 years in the provision on industrial computing solutions. With the introduction of the first industrial PC in 1990 DLoG have vast experience in the development of this type of hardware. Current products extend from touch screen industrial PCs (IPC) for displaying CAD data and work instructions in factories to the Mobile industrial PC terminals used in vehicles extensively in the logistics and warehousing sectors. Supporting the delivery of your essential business information direct to the operator at the point of use, our PC hardware can be configured with your choice of established and robust operating systems. With a range of screen sizes for mobile and static applications, coupled with the ability to develop solutions that are aligned with your build specifications, we maintain a strong focus on customer requirements, high quality and technical standards which enables us to supply and support customers in the successful implementation of even the most demanding computing infrastructure.

Barcode-IT is a division of Dash Computer Products and provides a wide range a data capture and warehouse management services to all types of customers, using barcode driven, mobile data collection terminals and wireless networks. In 2008 Barcode-IT launched "Dexterity WMS" version 2, a warehouse management system, which provides a bolt on fully featured WMS for all kinds of ERP systems including SAP, SAGE, Microsoft Dynamics, Navision etc. Dash Computer Products was started 17 years ago and provides all categories of barcode related products to medium and large enterprises. Industrial barcode printers are a particular speciality and Dash supplies printers from Zebra, Printronix and Datamax, the leading worldwide brands.

With compliments
