

## PRESS RELEASE

*DLoG MTC6 awarded by the "CLTA - China Logistics Technology Association":*

### **DLoG MTC 6 - Ultra-rugged Vehicle Mount Terminal A Top Ten Product**

14th Mar 2011 - Advantech-DLoG, an international leader in Industrial PC and eAutomation, is happy to announce its MTC 6 ultra-rugged vehicle mount terminal was recently recognised by the "China Logistics Technology Association (CLTA)", and the "China Logistics" product website. The selection process involved background research, expert recommendation, online voting and final adoption by an expert committee. The MTC 6 is a slim terminal, loaded with features that boost efficiency in logistics processing. It offers superlative performance for logistics applications in distribution centres, ports, warehouses and cold storage freezers.

#### **MTC 6 - One of the Top Ten Innovative Products of the Year**

The CLTA is China's only state-level logistics technology association which promotes the application of scientific and technological achievements. Its award recognises outstanding enterprises in the logistics industry and credits their efforts and contributions. DLoG MTC 6 stands above the competition and was honoured as one of the "Top 10 Innovative Products of the Year", a clear validation by the industry experts of its performance. Key factors in the award's decision were the MTC6's ultra-rugged design, 360° IP protection (IP66 and IP67 rated), design and mounting technology that protects against 5M3 levels of shock and vibration, and the ability to serve a variety of vehicle applications.

#### **Feature Packed, that's a Fact!**

The latest addition to the DLoG product portfolio, the MTC 6 is a 10" industrial PC, is designed to standards that leave competitors far behind: certified (IP, EN60721-3-5, 5M3) to survive whether dropped, shocked, vibrated or submerged in water; an integral diversity antenna which offers a reliable solution within a WLAN infrastructure, even in fast roaming situations; break proof touchscreen design able to withstand direct impact from a 500g metal ball at 1.3m distance; galvanically isolated electric design to increase safety; covered I/O ports and molded plastic protection of the WLAN antenna. These new features are designed to reduce the total cost of ownership and support increased process efficiency. As a mobile thin client the MTC 6 addresses the need for efficient, cost-effective IT operations in logistics. It is also the first industrial PC to be equipped with CFast technology, the mass storage system with a fast SATA interface, providing greater performance and stability in industrial applications. DLoG also offers first to market 7" and 10" LED

touchscreen displays on the XMT and MTC terminals. This enhancement means not only improved contrast and increased life expectancy but that no heater is required for operation in deep freeze or outdoor areas, giving these terminals an impressive operating range of minus thirty up to plus 50 degrees centigrade.

#### About DLoG GmbH

DLoG GmbH, Member and Competence Centre for International Mobile Computing (IMC) of Advantech-Group since March 2010, was established in 1985 and made a name for itself as a global player in the field of industrial applications and in-vehicle computing in extremely demanding environments, including the areas of construction machinery, forklift trucks and mining engineering, as well as industrial manufacturing. The new brand name Advantech-DLoG, combines the experiences and leading market positions acquired by both companies in the past with plans to develop Advantech-DLoG into a worldwide leading supplier within selected vertical markets such as warehousing, heavy duty and fleet management, delivering industry leading innovations, a very high level of quality and backed by extensive support, sales and marketing network of more than 3,600 dedicated employees in 18 countries and 39 major cities to deliver fast time-to-market services to our worldwide customers.

#### About DLoG UK

DLoG UK has been supplying software and hardware solutions since 1985 and strategically represents Advantech-DLoG in the UK. DLoG has a strong pedigree in helping companies to operate more efficiently and to maximise their return on investment. Our extensive range of touch screen terminals are used in warehousing, manufacturing and other areas where highly ruggedised devices are required. We work with software partners specialised in their field to deploy leading edge solutions for our customers.
