

PRESS RELEASE

Expansion of the successful partnership with dm-drogerie markt:

DLoG equips two of the most modern European logistics centers with DLoG IPC 7 industrial PCs

Olching, December 2nd, 2008 -

dm-drogerie markt is equipping its national distribution center in Waghäusel near Karlsruhe and its distribution center in Weilerswist near Cologne, which is currently under construction and to be in operation by the end of 2009, with a total of 370 DLoG IPC 7 series industrial PCs. In the future, fully automated picking will be carried out with them at the dm distribution centers, two of the most modern logistics centers in Europe. The high demands for reliability, high-value and mobility were decisive for high-performance DLoG industrial PCs. This continues the long-term partnership between dm-drogerie markt and DLoG GmbH that has existed since the first equipping of the distribution center in Waghäusel with DLoG PCs in 2004.

Further information is available online at www.dlog.com.

DLoG is the European market leader for industrial-suited vehicle mount terminals for industrial applications. On the basis of our boards developed in-house, we guarantee customized solutions, integrated with high quality and long-term secured support with regards to maintenance or system upgrades. Reliability is our first priority, especially with high environmental demands such as humidity, strong temperature fluctuation or vibrations.

Areas of application:

- Logistics applications, in particular floor conveyors in warehouses, goods distribution centers or harbors
- Visualization and control applications on construction and agricultural machinery, trucks, buses, rail vehicles, and in mining

Solutions:

- Vehicle mount terminals and stationary industry PCs based on our boards developed in-house and mechanics based on the Intel Celeron processor family (DLoG MPC 6) as well as the Intel XScale processor family (DLoG X7, X10, X12)
- Stationary industry computers, especially also for manufacturing applications based on the Celeron or the Pentium M processor family (DLog IPC 7)
- Consulting and project planning services, particularly in the areas of radio coverage and networks (especially WLAN)
- 3rd party products such as scanners, printers or MDE devices
