PRESS RELEASE

DLoG (UK) Ltd Announces a Partnership with Data Capture Specialists Footprint Wireless

Footprint Wireless extends its data capture solutions with the full range of DLoG
industrial vehicle mount terminals

Footprint Wireless and DLoG (UK) Ltd announce a partnership that will expand the current data capture solutions offered by Footprint Wireless, by adding the full range of DLoG vehicle mount computers to its line up of mobile terminals.

Operating primarily within the retail supply chain, workforce automation and inventory management, Footprint Wireless is dedicated to helping customers manage all their data requirements with comprehensive Data Capture, Data Networks, Data Storage and Data Centre Equipment services. By developing relationships with complementary services and solutions such as DLoG (UK) Ltd, Footprint is able to take a consultative approach to projects, identifying and specifying the most appropriate equipment and helping to develop a solution that addresses the real issues. Footprint supplies a wide range of equipment and solutions that enhance the ongoing impact of, and ongoing return from its core systems and applications.

Designed for use in the harshest of environments, DLoG mobile terminals make data capture and communication fast and easy, making them an ideal addition to the solutions delivered by Footprint Wireless. Offering protection class IP 67 rating on all models and full Windows XP pro, Embedded XP or CE operating systems, DLoG vehicle mount computers provide unbeatable reliability and flexibility in a wide range of diverse applications. Robust and easy to use, all mobile terminals offer a range of flexible

mounting systems, as well as WLAN connectivity and diverse interfaces for scanners and printers.

Cold stores and deep freeze applications are particularly well catered for as the DLoG vehicle mountable terminals are especially suited for demanding applications in extreme environments with operating temperatures from -30 to +50°C (-22 to 122°F).

DLoG places high value on its partner program, ensuring DLoG's partners and end-customers security with regard to their investment. DLoG (UK) Managing Director, John Davis says, "This partnership reflects our commitment to providing effective and high quality solutions to the manufacturing, warehousing & distribution markets. We strongly believe in the quality of the DLoG hardware portfolio and are confident that the addition of the DLoG brand to the data capture technology offered by Footprint Wireless, combined with its commitment to delivering the highest possible levels of customer service and support will continue to enhance our strong reputation for product value and customer satisfaction."

Ends

Note to Editors:

DLoG (UK) Ltd is celebrating nearly 20 years in the provision on industrial computing solutions. With the introduction of the first industrial PC in 1990 DLoG have vast experience in the development of this type of hardware. Current products extend from touch screen industrial PCs (IPC) for displaying CAD data and work instructions in factories to the Mobile industrial PC terminals used in vehicles extensively in the logistics and warehousing sectors. Supporting the delivery of your essential business information direct to the operator at the point of use, our PC hardware can be configured with your choice of established and robust operating systems. With a range of screen sizes for mobile and static applications, coupled with the ability to develop solutions that are aligned with your build specifications, we maintain a strong focus on customer requirements, high quality and technical standards which enables us to supply and support customers in the successful implementation of even the most demanding computing infrastructure.
